*Cancer + Operational is not simply the addition of the construction plus operational risk from above. Construction risk is 11 months; risk is evaluated for 30 years. Therefore Construction risk by itself is 11 months; Operational Risk by itself is 30 years and Construction + Operational Risk is 11 months of construction plus 29 years 1 month of operational risk)

***Since non-cancer risk is based on max annual, it will be the greatest of either the max construction or max operational risk and therefore can be the same as one of the values above.**
