Community Meeting – Wild Oak Project, Windsor, CA

Date: June 26, 2025, 5:30 PM
Location: Windsor Veterans Village
Attendance: Approximately 40 community members

Below is a summary of key questions raised during the meeting and the corresponding responses:

Will speed bumps be installed as part of the project?

- No. Speed bumps are not included in the project scope.

What utilities are being replaced?

- Only the drinking water pipeline will be replaced.

Why are the pipelines on Sirius Drive not being replaced?

- Sirius Drive is a newer development, and its pipelines are not in need of replacement.

Will service lines be moved?

- No. Service lines will remain in their current locations.

What is the plan for driveway access during construction?

- Driveway access will be maintained to the extent possible, though residents may need to park their vehicles in other locations while work is underway in front of their home.

There is a large pothole at Wild Oak and Railroad—will this be addressed?

- The Town will review the pothole and determine next steps.

Has the Town considered opening Kaiser Park for additional residential parking during construction?

- The suggestion was noted and may be evaluated.

How long will construction last on each street?

- Construction is expected to last approximately two weeks per street.

Will pressure valves be installed on new residential hookups?

- No. Pressure valves are not being included in the residential hook-up installations.

How long will valve replacement take per residence?

- On average, valve replacement will take 10–15 minutes, but it may take up to an hour in some cases.

Will mailbox locations be impacted?

- Only two mailboxes are expected to be relocated during the project.

Does a new meter installation include a new shutoff valve?

- Yes. A new shutoff valve will be installed on the Town's side of the meter.

Will the project schedule be posted publicly?

- Yes. The schedule will be posted and updated daily on the Town of Windsor website.
